"Protecting What Matters Most"

ABOUT HUAN SURVEILLANCE

HUAN Surveillance is a Pakistan-based security and surveillance solutions provider specializing in the design, supply, installation, and maintenance of advanced security systems. With over three years of industry experience, we help businesses, institutions, industrial facilities, and residential clients enhance safety, monitor critical assets, and maintain operational security through reliable and modern surveillance technologies.

Our commitment is to deliver practical, scalable, and cost-effective security solutions tailored to the unique requirements of every client. From small businesses to large-scale industrial environments, we focus on quality workmanship, technical expertise, and long-term customer support. Today, HUAN Surveillance proudly serves clients across Pakistan, providing dependable security infrastructure that helps organizations protect what matters most.

Our Vision

To become one of Pakistan's most trusted and innovative security solutions providers by delivering advanced surveillance technologies, exceptional service quality, and long-term value to our clients.

Our Mission

Our mission is to provide reliable, efficient, and technologically advanced security solutions that help businesses, institutions, and communities safeguard their people, assets, and operations. We strive to build lasting relationships through professionalism and integrity.

OUR CORE VALUES

At HUAN Surveillance, our core values guide our business operations, engineering principles, and client interactions across the country.

Integrity

We conduct our business with honesty, transparency, and strict professionalism in every engagement.

Reliability

We deliver dependable security solutions that our clients can trust to operate flawlessly when it matters most.

Quality

We maintain high standards in every project, from the initial site consultation to professional installation and technical support.

Customer Commitment

Our clients' security needs remain at the absolute center of everything we do, ensuring customized, exact deployments.

Innovation

We continuously adopt modern, future-ready technologies to provide the most effective security systems available in the industry.

OUR SERVICES

We provide complete security, surveillance, networking, communication, and infrastructure solutions — from system design and equipment supply to professional installation, configuration, integration, testing, and maintenance.

CCTV & Smart Surveillance

HD CCTV, IP Camera Systems, NVR/DVR, high-resolution and modern smart cameras with AI-based human & vehicle detection, motion detection, intrusion detection, line-crossing and advanced video analytics, remote monitoring and centralized video management.

Long-Range & Fiber CCTV Solutions

Fiber-based surveillance infrastructure for factories, warehouses, ports, farms, estates, campuses and long perimeters. Single-mode/multi-mode fiber, media converters, splicing, testing and redundant fiber paths for reliable long-distance camera connectivity.

Control Rooms & Command Centers

Complete CCTV control room and command center solutions including VMS, monitoring workstations, large displays, multi-monitor setups, video walls, centralized monitoring, network redundancy and 24/7 surveillance infrastructure.

Access Control & Biometric Systems

RFID/card access, fingerprint and facial-recognition systems, biometric attendance, smart door controllers, electromagnetic locks, exit buttons and centralized access management.

Door Phone & Intercom Systems

Audio, Video & IP Intercom solutions, video door phones, indoor monitors, outdoor panels, master stations and multi-point communication systems for residential, commercial and industrial facilities.

OUR SERVICES (CONTINUED)

Network & Structured Cabling

Complete Cat6/Cat6A and structured cabling infrastructure for CCTV, computers, servers and communication systems, including patch panels, PoE/managed switches, cable management, testing and organized rack cabling.

Server Room & Rack Infrastructure

Professional server room and network rack setup including server racks, wall-mount racks, patch panels, switches, PDU, UPS integration, fiber distribution, cable management and equipment organization.

Fiber Optic Networking

Fiber backbone design, installation, termination, splicing, testing and distribution for high-bandwidth building, campus and multi-site networks.

PABX & IP-PBX Telephone Systems

Business telephone infrastructure including PABX/IP-PBX, IP phones, extensions, internal calling, reception systems and centralized telephone management.

Network & Wireless Infrastructure

Routers, managed/PoE switches, enterprise Wi-Fi, network infrastructure and connectivity solutions designed to support security and business operations.

Security System Integration & Maintenance

Integration of CCTV, access control, biometric, intercom, networking, servers and communication systems, supported by preventive maintenance, troubleshooting, upgrades and technical support.

KEEP TRACK OF SECTORS

HUAN Surveillance engineers reliable security configurations across a versatile client landscape throughout Pakistan. Our architectures adapt perfectly to sector-specific operational rules.

Custom-Tailored Implementations

We recognize that an industrial manufacturing plant requires an entirely different perimeter defense architecture compared to a commercial corporate office or an educational campus. Our systems are engineered specifically to map to your daily operational flows without causing systemic friction or security blindspots.

- | | |
|----------------------------|----------------------------------|
| ■ Educational Institutions | ■ Warehouses & Logistics Centers |
| ■ Industrial Facilities | ■ Healthcare Facilities |
| ■ Manufacturing Plants | ■ Residential Communities |
| ■ Corporate Offices | ■ Government Organizations |
| ■ Commercial Buildings | ■ Semi-Government Environments |
| ■ Retail Stores & Malls | ■ Logistics & Distribution Hubs |

OUR WORK PROCESS

To ensure complete quality alignment and structural reliability, we execute every deployment according to a standardized 6-step engineering methodology.

1

Requirement Assessment

Comprehensive structural analysis of the client's explicit security requirements, baseline operational hazards, and long-term strategic safety objectives.

2

Site Survey

Conducting microscopic on-site layout inspections, signal testing, wireless line-of-sight analysis, and critical technical evaluations.

3

Solution Design

Developing comprehensive blueprint layouts, bandwidth allocation mappings, network schematics, and customized system architectures.

4

Installation & Deployment

Professional, clean physical deployment, structured low-voltage cabling, equipment anchoring, and system configuration by senior technicians.

5

Testing & Commissioning

Rigorous multi-point testing, failover analysis, camera angle tuning, dark-environment calibration, and comprehensive system optimization.

6

Ongoing Support

Providing structured routine maintenance, emergency on-site troubleshooting, software firmware upgrades, and immediate technical assistance.

WHY CHOOSE HUAN SURVEILLANCE

With years of active commercial experience and a track record of high-profile deployments, we provide uncompromised technical proficiency.

3+

YEARS OF INDUSTRY EXPERIENCE

90+

SUCCESSFULLY COMPLETED
PROJECTS

- **Nationwide Service Coverage:**
Capability to execute unified multi-city enterprise deployments all across Pakistan.
- **Customized Security Solutions:**
Zero off-the-shelf generalized packages; every blueprint is made to measure.
- **Professional Installation Standards:**
Rigid compliance with structural neatness, weatherproofing, and safety codes.
- **Reliable Technical Support:** Fast-response SLAs designed to keep your surveillance infrastructure live 24/7.
- **Cost-Effective Implementations:**
High-tier hardware optimization providing maximal protection for your capital allocation.
- **Proven Cross-Sector Domain Expertise:**
Verified experience serving complex educational campuses, continuous factories, and corporate headquarters.

NOTABLE EXPERIENCE

HUAN Surveillance has successfully delivered high-tier structural protection configurations for critical defense, industrial, and institutional environments.

Selected Client Feature:

CMES (Pakistan Navy)

Our successful delivery of professional security configurations within highly sensitive defense zones demonstrates our elite engineering capabilities, security compliance, and organizational trustworthiness.

HEALTH, SAFETY & QUALITY COMMITMENT

We prioritize zero-harm safety policies, technical quality compliance, and rigorous engineering standards throughout every phase of a project lifecycle.

Our site deployments rigorously adhere to international structural and low-voltage standards. This disciplined layout methodology ensures that all data pipelines and power loops are safe, fully shielded, properly insulated, and optimized for long-term structural durability. We work diligently to avoid any disruption to your company's active working environment during deployment.
